

CPI Safety Intervention – Foundation

CPI Safety Intervention Foundation training formerly known as MAPA, incorporates trauma informed and person-centred approaches. The programme is the perfect solution for professionals working in health and social care who need to prevent an/or intervention crisis situations. With a focus on prevention, it also teaches staff de-escalation skills as well as non-restrictive and restrictive interventions. Training Certified by Bild-ACT under the Restraint Reduction Network Training Standards.

Recognise and Respond to Crisis Behaviour

The Programme includes all the elements included in the Verbal Intervention programme. Starting with these previous skills candidates learn simple behaviour assessment and decision-making skills to ensure escalation is avoided.

When faced with a behavioural crisis that places staff or others at risk of injury, learning involves how to focus on the least-restrictive physical intervention to ensure the *Care, Welfare, Safety, and Security* to those being supported.

Safe Physical Intervention

CPI is the only training provider that includes physical interventions that have been independently risk assessed, following published research which demonstrates that they maximise safety and minimise harm and follows international standards of best practice.

Essentially, CPI has taken the term MAPA which was used to describe full curriculum and divided in into two distinct programmes:

Verbal Intervention is the programme that provides the instruction of all the CPI approaches.

Safety Intervention is the programme that provides the instruction of all the preventative interventions plus the disengagement and/or holding skills.

Evidence-Based & Internationally Accredited

The Crisis Prevention Institutes evidence-based approach has been successfully implemented for over 40 years and is nationally, and internationally accredited by IACET, RRN Training Standards, RQF and CPD.

Safety Intervention Training emphasises physical intervention as the last resort and only when appropriate and proportionate to the level of risk presented.

Count Care Services

Count Care Services has a dedicated training services department, with an experienced *Crisis Prevention Institute* certified instructor. This enables the registration and training of staff in accordance with the needs to ensure the best and most therapeutic service possible is provided to its clients.

Completion of the course provides you with a certificate and registration directly with the Crisis Prevention Institute. You will also receive a 'blue card', with your training and registration details.
